1643. As winter closes in around the town of Nantwich, the civil war that rages across the country, threatening to tear England apart, is yet to reach the town's gates.

But while the residents wait, eyeing the outside world with unease, they face a deadly threat from within:

Townpeople have started dying – murdered – the red sashes of the royalists left on the bodies marking them as traitors to the parliamentary cause.

It falls to Constable Daniel Cheswis to contain the bloodshed, but with few clues and the constant distraction of war, can he protect the people of Nantwich? And which among them need protecting? In these treacherous times, everyone's a traitor, whether it be in war, law, or love.

When the Winter Siege is through, who will be among the bodies?
